FRIDAY, MARCH 26th, 1943

NUMBER 47

Town Betterment Subject Of Discussion

A meeting sponsored by the Rotary Club, and including the Mayor and Council, the Lions Club Executive and the Board of Trade Executive, was held in the Sugar Bowl last Monday night, when a program of town betterment was discussed. A delicious luncheon preceded the remainder of the meeting.

Roi Stone as Program Chairman introduced Misses Kathryn Allen and Margaret Wing, who played two piano duets, and Miss Jeannine Wilde who sang two vocal solos. The girls gave a very fine rendition of their numbers and were roundly applauded by those present at the meeting.

Frank Taylor, Chairman of the Community Service Committee of the Rotary Club was the first speaker. He rehearsed some of the problems of the Town at present, including the water system, which needed improving, the streets and sidewalks which needed repairing and extending, and the crying need of a sewer system. He realized that all these things could not be even commenced in one, two or three years, but he felt that a long term improvement program should be worked out, so that each year a definite amount would be expended on some permanent improvement in the Town.

Warren Jones spoke of correspondence the Committee had with Towns where Town Planning Commissions were operating, and he suggested that a Town Planning Commission be organized in Raymond, so that in considering public improvements and planning for the future, the benefit of the services of the Government's men in these lines could be obtained.

Jack Watson, City Manager of Lethbridge, spoke briefly. He mentioned some of the errors that could easily be made in embarking on any public program and said that all improvements should be studied with a view to their cost, present and future. He mentioned some of the projects Lethbridge was working on and had planned, and said that it all depended on population, and how much taxes a corporation wanted to levy, so to what could be done.

Superintendent Fairbairn of the Lethbridge Experimental Station spoke very briefly along these lines.

The meeting was then turned into an open forum and a discussion for about an hour took place where a great many opinions were aired both for and against. A resolution was passed at the end of the meeting endorsing the idea of a long term improvement plan for the Town.

WEDDING BELLS

WIDGELL — BROWN

Miss Arlene, daughter of Mr. and Mrs. Wm. Widgell and Vern Brown, son of Mrs. Anna Bullcock, were united in marriage last Saturday afternoon at the home of Bishop Frank Steele in Lethbridge, with the Bishop performing the ceremony.

The young couple will make their home in Raymond where the groom is engaged with his father in the operation of their large farm south of town. We join with their many friends in wishing them happiness and success in their married life. A shower was held at the Jos. Kirkham home this week in honor of the bride.

NEWS NOTES

The Cheese Factory received 3,600 pounds of milk on Monday, the largest single day's receipts yet.

Mr. and Mrs. Howard Oliveritors Sunday, guests of the of Cardston were Raymond visitors of Mrs. Oliver, Mr. and Mrs. John E. Salmon.

Kano Sugimoto returned last week after spending several weeks in the Yukon on the Alaska highway. He enjoyed his experiences and the trip, but is glad to be back again in Southern Alberta.

Art Garner received a photo this week of the girls in the training camp at Vervilion, Alberta. Adrienne was on the picture but Marie Piegrass who enlisted at the same time did not appear in the picture.

Elders Albert Brandley, C. R. Hardy and T. T. Ogden were speakers at the Raymond 1st Ward Sunday evening last on a regular home missionary appointment. A large crowd was present and greatly enjoyed the meeting.

About 65 people from the Taylor Stake were at the Temple Wednesday, the Stake and Ward officers of the M.L.A. making a special excursion that day. A most enjoyable trip is reported and several from the Raymond 1st Ward were there for the first time.

James David Crawford, grand son of Mrs. Dave Richardson Sr. and Wallace Richard Lee, son of Mrs. Owen Lee, have enlisted during the past week in the Canadian Active Army at Calgary. We wish the boys the best of luck and a safe return.

Mr. Edward Beatty, until last year President of the C.P.R. and a member of the company's staff since 1901, passed away in a Montreal hospital. He had been ill for some time. He was a brilliant lawyer, a big business man, and a great organizer, his ability being felt in all departments of the Company. He was 65 years old.

Municipal Council Meeting

A. O. Peterson of the City of Lethbridge returned to the Council by acclamation, there being no opposition in his district.

R. M. Matson was elected Mayor for the coming year, and Mrs. Peterson as Deputy Reeve. R. W. Gardner of Lethbridge was appointed as Auditor for the District.

Mill Rate for 1943 was set as follows: Municipal 5 mills; Social Services 3 Mills; Educational Tax 3 Mills; Lethbridge School Division 16 Mills; St. Mary's River School Division 14 Mills; Magrath Municipal Hospital 3 Mills.

Reeve Matson was appointed to go to Edmonton with R. S. Thompson of Spring Coulee and Wm. Matson of Raley to discuss with the Minister the petition of the people in the Raley-Spring Coulee district regarding the inclusion of the balance of Improvement District 38, to which they belong, in the Sugar City Municipal District.

Permission Received For Hospital District

Members of the Board of Trade Hospital Committee were made glad over the week-end by Government authorities, for permission was received from the Hospital supervisor at two mills in the Municipal district of the Provisional Committee for the setting up of a Hospital in the district. This calls for one man from Sugar City M. D. and one from the Town of Raymond. In view of the overcrowded conditions of Lethbridge hospitals, and no cases except emergencies being received at all, this permission should not be overlooked by citizens of the districts affected, and it is hoped that taxpayers and interested will give the matter thorough study and careful thought, as it is something that will make for the better health of the districts served, and will guarantee hospital service of the finest type when needed and able for a successful district being organized here and a good hospital carried on at small cost.

The Committee has worked unceasingly for several months on this matter, and the Supervisor in his letter stated that prospects were very favorable for a successful district being organized here and a good hospital carried on at small cost.

Jacks Edge Out Macleod Flyers 37-35

In a game that was close all the way through, and was featured by moments when feelings ran high and fights were narrowly averted, Union Jacks, perennial Basketball champions in a few baskets, enough to keep the Jacks in the lead, and earned Alberta title by defeating the Macleod Flyers in the second of their best two out of three series by a 2 point margin, the final score being 37-35, the Jacks leading another field basket, but a split second too late to be counted.

It was not a good exhibition of Basketball. It was rough all the way through, and in all 46 personal fouls were called. 27 against Macleod, who had five men out for personal fouls, and 19 against the Jacks, who lost Nilsson, Nalder and Dunlop in the order named. The echo of the starting whistle had hardly died down when Rolfsen footed up a personal on a Macleod man for slashing, and this started the fire which blazed brightly all night, and fights were close several times. When Dunlop was given his fourth personal, he argued first with the referee, and when he got to the scorer's table a remark by Macleod's man, there almost cost him a busted nose as Bobby turned loose a short arm jab that just barely touched his chin but had it been two inches longer would have been a haymaker. While it was a game that was exciting and full of tense moments, it was not the type of game that one really enjoys when the opposing teams battle hard, take their fouls in good part, play as clean as possible and leave the floor with good feelings and as good friends. Fans and players alike felt like a person with a rusty dose of medicine to take when the struggle was ended after they had all been so pent up in their feelings.

Turner was potentially out of the game as a result of an injury to his right wrist received in Macleod Wednesday night. He dressed just in case, and ran the team from the sidelines and the "just in case" came when Nalder was shoved to the showers for personals, leaving the Jacks with four men. Fred went on and lead the team in some beautiful stalling, and manoeuvred plays that resulted in a few baskets, enough to keep the Jacks in the lead, and it was not many minutes until Macleod lost another man, and this made the teams four each. The stalling continued, and the Flyers in their anxiety to get the ball and score, fouled some more and another man went off. Then the Flyers tried to slip in a man not on their lineup and when the Jacks stalled this Macleod finished with three men out and Raymond with four. The last two minutes seemed like an age as Raymond battled to 19 against the Jacks, who lost Nilsson, Nalder and Dunlop in the order named. The echo of the starting whistle had hardly died down when Rolfsen footed up a personal on a Macleod man for slashing, and this started the fire which blazed brightly all night, and fights were close several times. When Dunlop was given his fourth personal, he argued first with the referee, and when he got to the scorer's table a remark by Macleod's man, there almost cost him a busted nose as Bobby turned loose a short arm jab that just barely touched his chin but had it been two inches longer would have been a haymaker. While it was a game that was exciting and full of tense moments, it was not the type of game that one really enjoys when the opposing teams battle hard, take their fouls in good part, play as clean as possible and leave the floor with good feelings and as good friends. Fans and players alike felt like a person with a rusty dose of medicine to take when the struggle was ended after they had all been so pent up in their feelings.

Turner was potentially out of the game as a result of an injury to his right wrist received in Macleod Wednesday night. He dressed just in case, and ran the team from the sidelines and the "just in case" came when Nalder was shoved to the

Youth Trade School At Saskatoon

NEWS NOTES

The High School sponsored an overall and apron dance Saturday night, culminating Sadie Hawkins week. The girls paid the tickets did the asking for partners and showed the boys a real time. Music was furnished by Cody's Seven and there were some great costumes on the floor during the evening, everyone having a grand and glorious time.

LINE ELEVATORS SUITLY MILITARY CAMPS WITH BOOKS

During the depression years, The North-West Line Elevators Association established 357 circulating libraries at line elevators located throughout the drought-stricken areas of the prairie provinces. More than 22,000 volumes dealing with fiction, history, economics and related subjects were contained in the libraries. These books were available without charge to all farmers and the libraries were changed periodically in order to furnish each district with new reading material from time to time.

It is felt that these libraries have now served their purpose, and a recent meeting of the directors of the Line Elevators Association it was decided to turn all these libraries over to the Canadian Legion War Services for use by the armed forces in military camps. Line country elevator agents have been advised to forward the books to various centres and in this manner Canada's armed forces will be provided with many excellent books which have been enjoyed by the farming population of Western Canada in recent years.

School Holidays Start July 31, Run to October

Edmonton, March 20.—Premier Aberhart minister of education, introduced a bill in the Alberta legislation Friday to have school vacations start August 1 this year and extend to October to make teachers and students available for harvest duties on Alberta farms.

After this year, schools will remain open during July and holidays begin on August 1st. The bill also provides teachers shall be paid their salaries in 12 equal monthly instalments, beginning with their salary for the month of September.

The bill also provides for elimination of certain holidays so as to make up the time lost through the extended summer vacation.

NO EASTER HOLIDAYS

It provides that Easter holidays, usually of 10 days, be eliminated and in 1944, Easter Monday will be the only vacation of that period. It also takes from local school board the power to grant holidays on Ash Wednesday, the King's birthday, Labor Day, Arbor Day and other specially designated holidays throughout the year.

After the 1943 summer vacation from July 1 to Oct. 10, summer holidays will be from Aug. 1 to the day immediately preceding the second Monday in October.

The bill, to regulate the op-

Fifty young Alberta soldiers between 17 and 18 years of age will soon be enroute to Saskatoon where a new trades training school to train 500 young men has been established, it was announced here today.

The school, which will train youths from the three prairie provinces, opened Monday (Mar 22nd) with the arrival of 200 boys whose applications had already been reviewed and accepted by military authorities. Existing facilities of No. 12 which is equipped to train and quarter 500 personnel will be used.

The course for the young student soldiers will be of 13½ months duration. For the first two weeks they undergo rigid elementary military training. An "orientation" course of three months will follow the elementary training. During this period the soldiers will receive instruction in academic subjects as well as general technical training. Aptitudes shown in this course will decide whether the soldier will specialize in radio range finding, wireless mechanics, electrician, artificer, machinist, fitter, instrument mechanic, fitter of motor vehicle, motor mechanic, draughtsman or clerk.

For the following 10 months he will be given an intensive course in the special trade for which he has been selected.

Subjects taught during the "orientation" period will be English and current affairs, mathematics, general science, draughting, metal work electricity and motor mechanics. Military training will consist of one hour per day except Saturday when four hours will be given.

During the 13 month period academic subjects will be taught as well as subjects relative to the trade which the student soldier is undergoing. The academic subjects will be in line and progressive to that received in previous schooling.

Capt. R.P. Fitzgerald, G.S.O. in charge of Trades Training in Military District 13, estimates that approximately 30 youths per month will be sent from Alberta to the new School. Periodic visits to the school will be made by officers from No. 13 Vocational Training School for the purpose of reporting on the progress of the young soldiers from this District.

operation of schools during the period while Canada is at war results from a recent manpower committee on agricultural survey parley of the consultative bodies, which suggested school holidays be extended to provide farmers with war scarce-labor.

For the purpose of school business operation, the bill provides that the school year begin on March 1 and end Feb. 23 following and shall be divided into two terms ending Aug. 31 and Feb. 28, respectively. The former will be known as the June term and the latter the December term.

It is estimated that between 20,000 and 25,000 boys of high school age will be made available throughout the province for agricultural and other seasonal work by passage of the bill.

The bill was given first reading—Lethbridge Herald.

A BETTER TOWN EACH YEAR

We are at the beginning of another spring; another season when the Town Council will discuss and decide on its public works expenditures for the current year. There is undoubtedly something to think about in the suggestion of the meeting Monday night, that a long term program of civic improvement be mapped out and adhered to. Each year the Council looks around and tries to decide on what work is most urgent and most deserving, and they go to work there. That particular year may be the only year

for the next five or ten that any is done in that particular locality, as some other street is chosen next year. By the time they get back to project No. 1 the effect and benefit of one single year's work is largely lost. No one is particularly to blame. It is a system that has been followed for a long time, and while not 100 p.c. efficient has been considered the best way to proceed. One can look over our own town and see cases where a follow up program for a year or two on certain streets, without the expenditure of a great deal of money would have made a much more lasting improvement than has been the case.

After all, that is all that is at the foundation of a long term improvement plan. That whatever work is commenced, be commenced with the idea of working to finish it up, either in whole or in sections, so that benefits of one year's work are not lost before more work can be done. Whatever projects are contemplated could be considered in this light, as a mere matter of economy and good business on the part of our Town Council.

Men, Women Over 40 Feel Weak, Worn, Old?

Want Normal Pep, Vim, Vitality?

Does weak, run-down, exhausted condition make you feel faded out, old? Try Oitex. Contains general tonic, stimulants, often needed after 40 or 45. Supplies iron, calcium, phosphorus, vitamin B. Helps you get normal pep, vim, vitality. Incredibly size Oitex Tonic Tablets only 20¢. For sale at all good drug stores everywhere.

YOUR FARM is the Battlefield ON THE HOME FRONT...

WORRIED about your farm machinery lasting? You've a right to be! Because, when your farm machinery quits, you're stuck.

So, don't gamble. Give every piece of your farm equipment a chance to give you longer, uninterrupted service.

You can do this by keeping it properly lubricated with McColl-Frontenac farm lubricants. Outstanding amongst which are:

RED INDIAN MOTOR OIL and RED INDIAN AVIATION MOTOR OIL

Here are two great oils that will lengthen the life of any engine. They ensure full power and economy under all operating conditions. These finer oils combat acid corrosion, friction, waste and wear. They stand up under highest engine heat... they flow and lubricate the moment the engine starts.

TEXACO MARFAK For Wheel-Bearings and Vital Friction Points.

This famous lubricant lasts longer and lubricates better under the toughest working conditions. It is self-sealing and

keeps the working lubricant in where it is needed most, prolonging life of bearings and universal joints by keeping out rain, mud and dust.

URSA X** (CANADA)

The Perfect Motor Oil for Diesel and Heavy-Duty Gasoline Engines.

Highly resistant to the formation of gum, sludge and carbon, Ursa X** (Canada) keeps rings, ring grooves, valves, screens and filters clean. Provides maximum bearing protection. Ensures full power and lower fuel consumption.

Get a supply of these and other "fighting" lubricants for the farm from the McColl-Frontenac Representative in your district. Keep your equipment in fighting trim.

FREE

Here's a handy, everyday reference book. It tells you how to make an economical farm workshop, how to properly hitch implements to tractor, and a hundred other ways to save time, money and labour 'round the farm. Write today for your free copy to McColl-Frontenac Oil Company Limited, Montreal, Toronto or Calgary.

HOW TO FILL OUT YOUR APPLICATION
FOR CANNING SUGAR

This year housewives must estimate in advance the amount of sugar required for canning and jam-making, so that arrangements may be made to provide and distribute the necessary supplies. Applications must be sent in to your Local Ration Board by April 15th. Use the application in your new Ration Book for this purpose.

Canning sugar will be allowed for all fresh fruits, including citron and wild fruits. Marrow, tomatoes and pumpkins are considered as vegetables and no canning sugar will be allowed for them.

— HOW TO FIGURE OUT THE AMOUNT OF SUGAR NEEDED. —

CANNING

Allow 1/2 lb. of sugar for each quart sealer.

Estimate the TOTAL number of quart sealers you plan to put up—then use the quick, practical method of allowing 1/2 lb. of sugar for each quart sealer. Don't try and decide exactly the number of each kind of fruit you plan to put up. Some fruits may be more plentiful than others. Base your estimates on the number of sealers you have on hand, what you put up last year, or what you think your needs will be this year.

Your completed application must be sent to your Local Ration Board by

Estimates based on these methods are within the canning sugar ration, and the amounts are satisfactory for wartime canning and jam and jelly making, as proven by test in the Dominion Department of Agriculture experimental kitchens.

JAM or JELLY MAKING

Allow 1 1/2 lbs. of sugar for each quart of jam or jelly.

Most people use jars of various shapes and sizes. Take a number of the jars you usually use and see how many cupfuls of water they hold. Four (4) cups make a quart. In this way you will be able to estimate the number of quarts of jam or jelly your jars will hold. Then allow 1 1/2 lbs. of sugar per quart for your requirements. For example, for 8 quarts of jam or jelly, you will require 12 lbs. of sugar.

IMPORTANT NOTE

The Dominion Department of Agriculture recommends canning fruit in preference to making jam or jelly because:

More fruit can be put up with less sugar and at less cost.

Canned fruit retains more of the vitamin value of the fresh fruit.

WHEN AND HOW CANNING SUGAR WILL BE MADE AVAILABLE

When your Local Ration Board has reviewed your application you will be provided, sometime before June 1st, with special canning sugar coupons. These coupons will entitle you to buy sugar, at any grocery store, at specified intervals. You do not have to buy all your sugar at once.

COMPLETE AND SEND IN YOUR APPLICATION BEFORE APRIL 15

Complete your application form as shown in the illustration and mail it to your Local Ration Board not later than April 15th. Attach the application forms from the ration books of the other persons you will be feeding in your household. Do not write anything but the serial numbers of the owners on these other forms. Simply copy the serial numbers from the front of their ration books on to their application forms and pin them to your own fully completed application.

In estimating your canning and jam-making requirements, storage space should be carefully considered. Poor storage may cause spoilage and waste. Canned fruit should be kept in

a cool, dry, dark place. Don't use canned fruits on your table when fresh fruits are available. Plan to use your home-canned fruits in the winter months only.

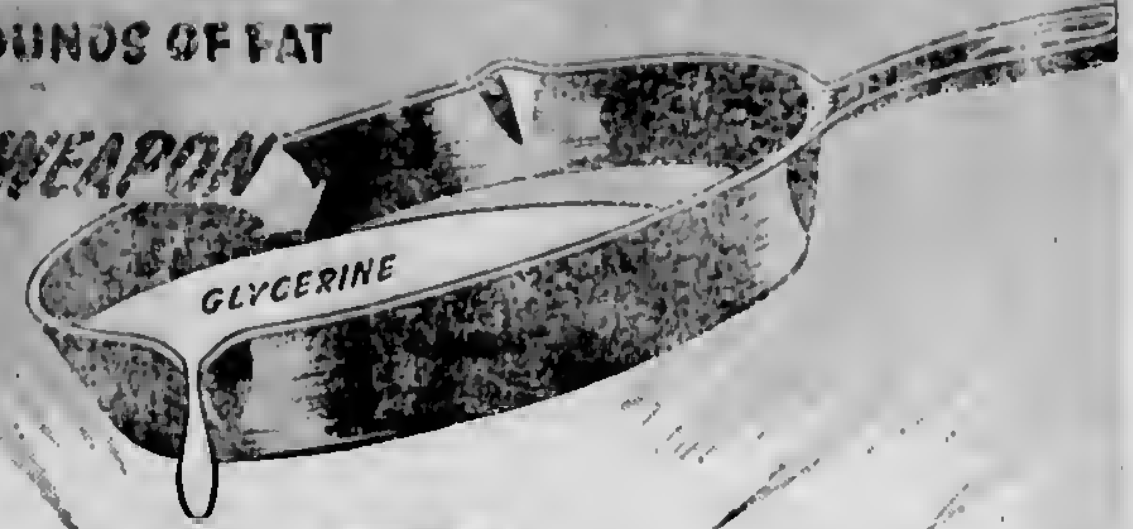

Remember—False Statements are Subject to the Full Penalty of the Law

RATION ADMINISTRATION

THE WARTIME PRICES AND TRADE BOARD

CANADA NEEDS 40 MILLION POUNDS OF FAT

HERE IS YOUR SECRET WEAPON

Save Fats and Bones

AND HELP SMASH THE AXIS!

The next time you are frying or roasting something, just imagine the collection it would give you to pour that hot fat right down the back of Adolph, Tojo or Benito.

You can even do better than that. Fats make glycerine, and glycerine makes high explosives to sink their submarines, destroy their aeroplanes and tanks. Bones produce fat, also glue for war industry.

Every spoonful of dripping, every ounce of scrap fat, and every bone, cooked, uncooked or dry, must be saved. Strain all drippings through an ordinary strainer into a clean wide-mouthed can. When you have collected a pound or more of fat drippings take it to your meat dealer who will pay you the established price for the dripping and the scrap fat. Or you can do part of them through any Municipal or Salvage Committee collection system IN EFFECT in your community.

You can be a munition maker right in your own kitchen. So—every day, this easy way, keep working for Victory by saving every drop of fat dripping, every piece of scrap fat, and every bone.

This campaign is for the duration.

DEPARTMENT OF NATIONAL WAR SERVICES
NATIONAL SALVAGE DIVISION

WARBLES AND
SAVE MONEY

It is warble time now. Grubs that hatched from the eggs the heel fly laid on your cattle's heels last summer are now appearing on their backs.

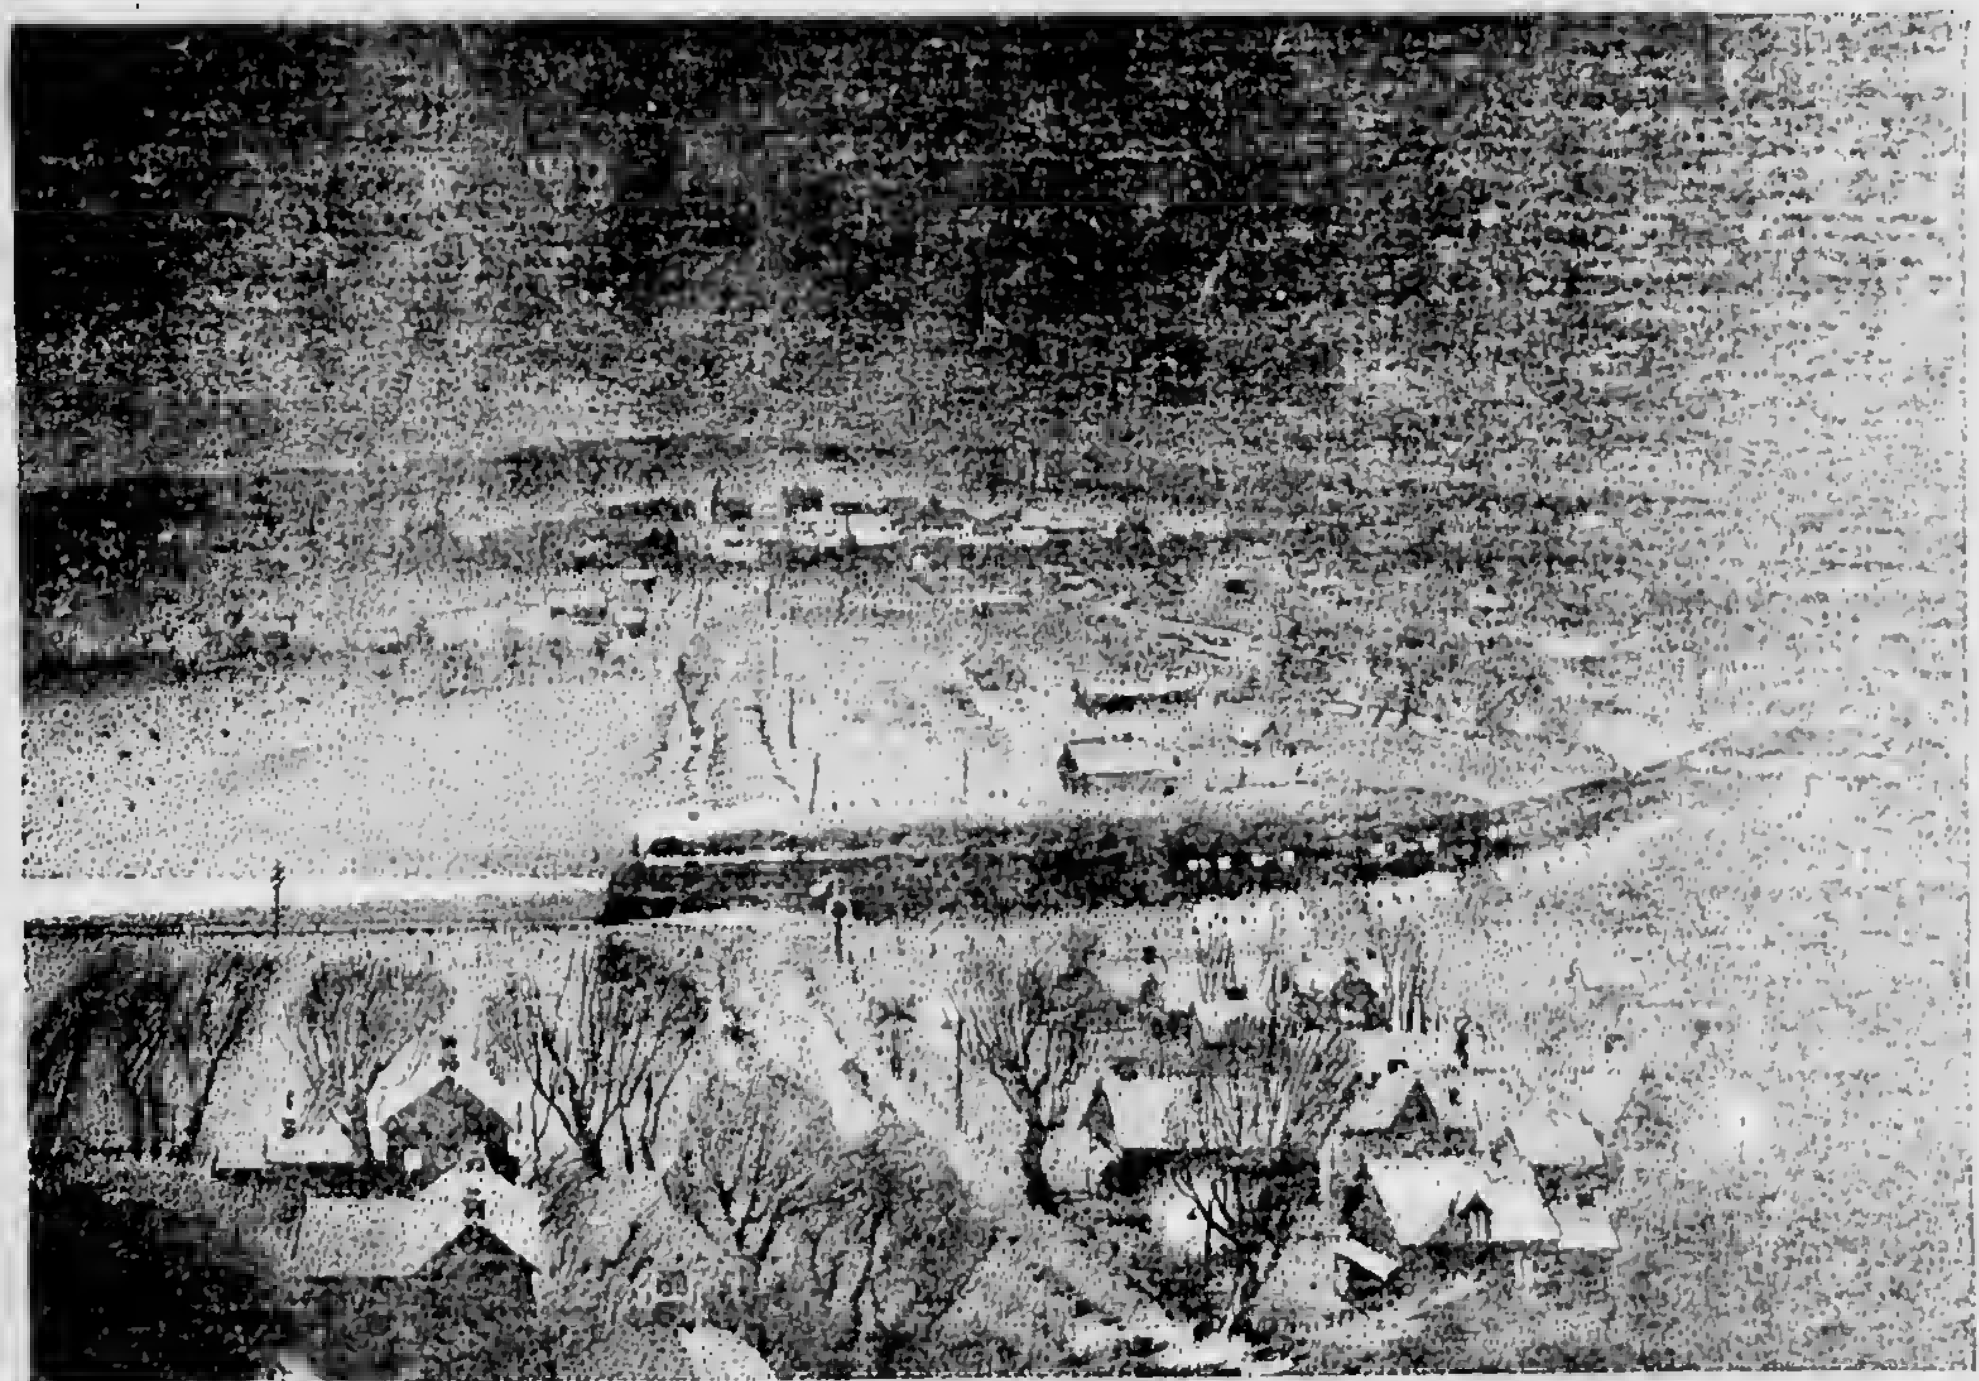

Average cost to farmers in Alberta is \$2.75 per animal but

you must add 20 per cent loss in milk, and 15 per cent in reduced gains. From November, 1940 to May 1941, there were 62 per cent of all hides with more than four warble holes, making them practically useless.

A good hide is 11 per cent of an average steer's value. Treat ment is quick, easy and effect

ive, and costs but 3c per head.

The Friday Night Book Club entertained their husbands at a Rook Party at the Milford Allred home last Friday night. Supper was served, and the evening spent in Rook, prizes for high score going to Mr. and Mrs. Miff Allred and for low score Mrs. T.T. Mendenhall.

WAR WHOOP

1943 MODEL

YOU HEAR IT at all hours . . . that long-drawn cry of the locomotive whistle. It's the war whoop of the railways.

It may be a troop train speeding to keep a date with a convoy . . . it may be a long freight loaded with tanks, guns and other materials of war, many of them built by the railways themselves . . . it may be another week's supply of raw materials to keep a war plant in production, or food, fuel and other essentials for the home front.

It is the proud war whoop of Canada's greatest war industry—the railways, which are serving the nation as effectively in war as in peace. Only the railways can furnish mass transportation on such a scale.

Your railways were ready . . . ready in war, so that Canada could strike with all her might. They will be ready in peace again to serve a greater Canada . . . rolling ever forward on highways of steel.

purchased by retail merchants. Now that we are establishing registered egg-grading stations throughout the country and retail merchants are prohibited from grading eggs, many of these lamps are no longer in use. Owing to war conditions, it is impossible for the manufacturers to keep up with the demand for these lamps, and an urgent appeal is being made to any persons who have in their possession a Caswell or other efficient grading lamp to contact the Poultry Branch, Alberta Department of Agriculture, Edmonton, as these lamps can be sold providing they are in good condition and have the transformer attached.

ELECTRICITY
SEES THAT
THEY ARE!

ABOVE: Pouring the flux over an aeroplane part that has been electro-magnetized by the apparatus also shown.

LEFT: This electrical machine completely demagnetizes parts after testing so that the plane's ignition will function normally, and instruments with the required precision-accuracy.

RENEWAL OF UNEMPLOYMENT INSURANCE BOOKS

To all Employers:

The 1942-43 Unemployment Insurance Books expire on March 31st.

New Insurance Books for the fiscal year 1943-44 will be exchanged by the Local Employment and Selective Service Office in your area for expired Insurance Books.

Do not send in your Insurance Books without completing forms enclosed with circular letter 625.

If you have not received this circular letter, get in touch with your nearest Employment and Selective Service Office.

Where it is necessary to quote the Employee's Insurance Number, use the number with the prefix letter shown on the front cover of the book: example P-49247, E-22454. Do not quote the book serial number printed on the inside pages of the book.

Protect the benefit rights of your employees by following closely the procedure outlined in the circular letter, and prevent delays by acting now.

UNEMPLOYMENT INSURANCE COMMISSION

HON. HUMPHREY MITCHELL
Minister of Labour

Commissioners:
LOUIS J. TROTTER
R. J. TALLON
ALLAN M. MITCHELL

WHEN instructors and students in the Commonwealth Air Training Plan take to the air they have absolute confidence in their machines. They know that every proven scientific method and device has been used to assure perfection of every individual part.

In assuring this perfection one of the most interesting procedures is the testing of steel parts. Each part is given an Electro-Magnaflex test. Any flaws so small that the human eye cannot detect them are instantly spotted by this method.

The steel parts are first highly magnetized by an electric current. Then over each part is

poured a flux consisting of minute steel particles in a fluid base.

Where the metal is perfect the flux flows off, but where there is the slightest crack or invisible break in the metal, the iron particles cling tenaciously, indicating to the operator the flaw in the metal. Such parts are "grounded".

At 300 miles or more per hour every part must be perfect, and through the Magnaflex test, Electricity assures that it is perfect.
